

ProjectHub

1. Install Required Libraries

Open Command Prompt and run:

```
pip install pandas numpy scikit-learn matplotlib  
seaborn
```

2:Generate Dataset (Run Once) Run this command
in the project folder: `generate_dataset.py`

This creates the dataset inside the data folder.

4. Run the Machine Learning Notebook

(Optional) To view analysis, graphs, and

accuracy, open: `model_training.ipynb`

5. Run the Final Application (Main Step)

This is the actual student performance prediction
software: `student_predictor_ui.py`

6. Notes

You only need to run the UI file daily.

The dataset and model load automatically.

No need to regenerate the dataset unless desired.

No need to run the notebook unless you want analysis.
